

**Session Name:** Plenary Session 2: The NCIC CTG CO.17, CO.20 & CO.23 Colon Cancer Studies: Examples of Successful Phase III Trials

Educational Objectives: At the end of the plenary subsection the participant should be able to:

1. Understand the key elements affecting the successful conduct of Phase III clinical trials in oncology.
2. Illustrate how these elements were achieved in the examples provided.

Apply these elements in the design and implementation of future trials.
