Objectives for CME accreditation

1. To understand the results of recent clinical trials in controlling symptoms of patients with cancer and the potential for future adoption of their interventions
2. To explore the role of psychosocial interventions to alleviate cancer symptoms and improve treatment-related outcomes
3. To consider opportunities to expand the use of palliative radiotherapy for the management of symptoms
4. To discuss clinical trials in the field of palliative care
5. To review opportunities to conduct trials using new methodologies

08:00 Welcome new executive committee members M. McKenzie / C. Zimmermann
08:10 Patient Rep presentation J. Needham
08:30 European Palliative Care Research Centre: Ongoing trials, potential collaboration S. Kaasa
09:10 ACTIVE TRIALS and Secondary Data Analyses
(10 min each)
CO21: Exercise & Colon CA (5+5) H. Richardson / C. Booth
HE1: RT and Symptomatic Liver Ca (5+5) L. Dawson / P. Wong
SC24: SBRT in Spine Mets (5+5) S. Myrehaug / A. Sahgal
09:40 APPROVED TRIALS
(10 min)
Palliative care G. Rodin / C. Zimmermann
SC26: EASE and Acute Leukemia (5+5)
09:50 BREAK
10:00 TRIAL PROPOSALS
(15 min each)
RT-related concepts
1. SBRT vs standard for non-axial bone metastasis (10+5) A. Sahgal
2. Brain Met Concept (10+5) A. Nichol
Self-Management of Toxicities and Symptom Management
3. Remote Advanced Symptom Monitoring and Management (10+5) D. Howell
4. Role of Ensure Protein Max on calorie and protein intake, appetite and body weight (10 + 5) Martin Chasen
11:00 Survivorship
5. Mindfulness-Based Cancer Survivorship (10+5) Linda Carlson
11:15 Medical Cannabis
Clinical Trials of Medicinal Cannabis in Oncology: State of the Science and a Path Forward L. Balneaves & C. De Angelis
11:55 Wrap-Up
12:00 Meeting Adjourned
