

[CCTG members](#)

Resources for our member sites

The Canadian Cancer Trials Groups (CCTG), works with researchers across Canada to foster the creative discoveries in innovative clinical research that will improve health outcomes for people with cancer. This means that CCTG investigators and trial teams conduct international caliber research, and Canadians have early access to promising cancer treatments.

[Trial Pages](#)

Each CCTG trial has a trial conduct page which is home to the related conduct information for our trial teams at our member sites.

[Becoming a member](#)

All centres in Canada providing medical care and consultation to cancer patients are eligible to become Member Centres of the Canadian Cancer Trials Group.

[Funding information](#)

CCTG participating centres receive funding for each case randomized.

[Generic protocols](#)

The most up to date templates for sites to develop their protocols and a history of updates to the generic protocol and generic consent.

[Office of audit, inspection and partner compliance](#)

The Office of Audits, Inspections, and Partner Compliance (OAIPC) is responsible for the

coordination and implementation of all internal audits.

Disease site and IND committees

Each of the CCTG committees review proposed studies to recommend trials for consideration to the Clinical Trials Committee.
